## Public Safety Assessments

### Instructor's Package

This turn-key system provides all the materials needed to educate students on the development, psychometric properties, application, and interpretation of PAN's psychological assessments for the evaluation of candidates for public safety and security occupations and other positions of trust.

The Instructor's Package includes PowerPoint® presentation slides, and test and report manuals for classroom reference and instructional use.

We also provide every student in your class with a free test administration and interpretive report so they can personally experience our flagship personality assessment, the *16pf® Questionnaire*. As each student completes the questionnaire online, PAN immediately scores the assessment and sends the student's *16pf Protective Services Report* to you via email.

Students also receive case studies to facilitate the study of key assessment reports and how they can be used to identify the best candidates for public safety occupations.

#### Who is eligible?

Instructors who conduct a graduate-level course in Assessment, or a graduate-level course with an applied focus on pre-employment screening and promotional testing.

#### What does the Instructor's Package include?

- Presentation Slides for the instructor
- White papers, research articles, and other support materials for classroom handouts
- Manuals for classroom reference: *16pf Fifth Edition Questionnaire Manual*; *Inwald Personality Inventory-2 Manual*; *Psychological Evaluation Questionnaire Manual*; *Manual for the Protective Services Reports*
- Online administration of the *16pf Questionnaire* and a *16pf Interpretive Report* for every student
- Case studies of both "good" and "bad" candidates for each of these reports:
  - ✓ *16pf Protective Services Report* (pre- or post-offer)
  - ✓ *16pf Protective Services Report Plus* (post-offer)
  - ✓ *Inwald Personality Inventory-2* (post-offer)

#### How do I request materials for my class?

Send a written course description and the approximate class size on official university letterhead with the instructor's name, signature, email address, and daytime phone number.

### Research Assistance

A research assistance program is available to both professors and graduate students who are conducting applied research using the *16pf Questionnaire* or *Inwald Personality Inventory-2*. Visit the Resources section on [16pf.com](http://16pf.com) for additional information.
